Fluency Matters!

One-of-a-kind language classes guaranteed to build communication skills!

What makes these classes different?

Research shows that people who learn more than one language reap numerous benefits:

- Improved memory, problem-solving and critical thinking skills
- Enhanced concentration and ability to multitask
- Superior decision-making skills (Deliberating in more than one language, distances us from emotional responses and moves us toward facts.)
- Significant competitive edge in the job market. (Being bilingual is among the top 8 skills required of **all** occupations.)
- Improved communication skills and expanded vocabulary in your **FIRST** language.

Research shows that learners taught with CI – based strategies achieve much higher levels of proficiency. Why?:

- Focus on **COMMUNICATION**.
- Learners are inspired to unconsciously acquire high-frequency words & phrases that are used in everyday communication.
- Low-stress, high-interest activities that are comprehensible, enjoyable and effective.
- Continuous interaction with a manageable and achievable amount of vocabulary.
- Highly engaging, fun and personally relevant lessons that naturally and efficiently result in **FLUENCY**.
- Realization that language is meant to be comprehended, **NOT** studied.
“I studied language for X years, BUT ...”
